

Colour Theory

Go to this site: <http://www.mariaclaudiacortes.com/#>

Right click the above link, and open in new window.

1. Open door number 1 and read all the colour characters' profiles.
2. Then open door #2 and play the six movies.
3. Then open door #3 and create a scene in the lab. Make sure you complete the scene mood.

AFTER you have completed the above task you will show your picture to Mr.Olson and answer the following three questions about your scene.

1. Why did I use the colours I have chosen and what do the chosen colours add to the finished picture?
2. Why did I use the images I have chosen and what do the chosen images add to the finished picture?
3. Why did I use the layout I have chosen and how does it impact the finished picture?

Make sure to save the answers to these questions in Microsoft word and then save them in your D:/TGJ3M01/final photoshop folder.

Save your answers as lastname colour.doc
