

## **Framing**

Take one of the black frames to a pre-chosen location (outside the school).

Frame up a shot that will have important elements within the frame. Pay attention to the background as well; it should be complimentary to the subject matter.

Pay attention to the colour – you are trying to create an aesthetic contrast of colours.

Take the photo - use several different angles and "framings" to get the best possible picture.

Try to give your composition some depth.

Choose to make the interior or the exterior of your frame b/w. Use the various cropping tools (masking) for your selection.

Repeat this process three times. Try to create a connection between the three photos.

Save them as them as `firstname_lastname.framing.jpg`

Also: number them for clarity.
