

Hillcrest Ink

1. Choose a celebrity who will be the first customer of ***Hillcrest Ink.***
2. Help them choose a tattoo and the location for that tattoo...sizing...colour...also keep it PG, as always.
3. Place the picture of the tattoo on the celebrity, blend it in, and use skew, distort, and perspective to shape the tattoo onto the person. These tools can be found under Image and then Transform. Liquefy may also be useful.
4. Your goal is to make it look as realistic as possible.
5. When you are done create a before and after image on one new file.
6. Save as **firstname.lastname.ink.jpg** – place the file in your tests and exercises folder.
